Evaluation criteria

1. Excellence

- *Clarity of the objectives;*
- *Soundness of the concept, including trans disciplinary considerations;*
- Credibility of the proposed approach;
- *Ambition, progress beyond the state of the art.*

2. Impact: [...] contribution to:

- *The expected impacts listed in the work programme*
- Enhancing innovation capacity and integration of new knowledge;
- Strengthening the competitiveness and growth of companies by developing innovations meeting the needs of European and global markets;
- ...measures to, disseminate and exploit the project results,... communication.

3. Quality and efficiency of implementation

- Coherence and effectiveness of work plan, ... allocation of tasks, resources;
- Competences, experience and complementarity of the individual participants, as well as of the consortium as a whole;
- Appropriateness of the management structures and procedures....risk management.

- ERC frontier Research actions only EXCELLENCE
- Innovation actions higher weighting for "IMPACT"
- Proposal evaluated by the experts "as it is"
- and not as "what could be" = no need for negotiation

First stage considerations
in **RED**

The Consortium

Meeting the criteria with a 'balanced' Consortium:

1. The basic research
 - **Science & Technology** partners
2. Users of Technology & Implementation
 - Partners with expertise to **develop, test & validate the scientific premise, technology or other outputs**
3. IMPACT of the R&D outcomes on the target market
 - Partners with expertise & experience to **disseminate & exploit the knowledge/solutions generated**

Normally - at least **3 legal entities from 3 different EU member states or Horizon 2020 Associated Countries**

- Additional legal entities depending on project
- Strong emphasis on 'Innovation' in Horizon 2020 – where appropriate include non-academic sector partners e.g. SMEs
- Mention of international collaboration with e.g. BRIC doesn't guarantee funding
- Consider:
 - Who you have worked well with before
 - What your expectations are
 - Budget, IPR, management issues as early as possible

Horizon 2020 – How to participate?

Any institution may participate either as a **Partner** or as a **Coordinator!**

- Responsibilities of the Coordinator:
 - Submits the proposal and (generally) leads the project.
 - Reporting responsibilities
 - Receives payment from the Commission and distributes to partners
 - Acts as a 'hub' for queries between Partners and Commission
- Resources and Benefits?
 - Coordinator receives adequate funding for resources to manage the consortium. Costs are claimed as incurred and cannot lead to a profit.
 - Closer links to Brussels
 - Prestige (?)
- Partner
 - Works on their work package(s)
 - Submits reports to coordinator
 - Contributes to “a smooth and successful implementation of the grant”
 - Supports the coordinator in their obligations

BUT Be realistic

Start small and work up:

If you are new to EU funding, start with a MSCA IF (bottom-up so open to all fields)

Do not attempt to coordinate a H2020 project unless you already have experience of managing large-scale, preferably international, grants – evaluators will be looking for experienced Coordinators

If you are the Coordinator, do not underestimate the considerable amount of time you will have to spend managing the project, even if you have a dedicated project manager.

Carefully check partners if invited to join a consortium by anyone with whom you have not previously worked – personal contacts are best

Find project partners
